

Inauguration of Operator Training Simulator (OTS)

To train the Panel officers and to boost the plant performance. Operator Training Simulator(OTS) designed by M/s Honey well has been inaugurated at RFCL Main Control Room (MCR) on 19.07.2019 by Shri Rajan Thapar, CGM – Project Site.

This system empowers RFCL to train the operators in operations of Ammonia Plant and supports panel officers to gain the knowledge on probable process upsets and required control actions. These control actions can be monitored, evaluated for operator proficiency which in turn helps RFCL to train the operating staff to run the ammonia plant efficiently.

Shri Rajan Thapar, CGM – Project site inaugurating the OTS at main Control Room, RFCL

CGM-Project site and Chief Manager- Instrumentation examining the OTS while the Honeywell officers demonstrating the system.
